VOLUME CONTENTS

VOLUME 67 2003 NUMBER 1

CONTENTS

Gorimir Gorimirovich Chernyi (80th birthday tribute) 1
G. E. YAKUNINA: The dynamics of pyramidal bodies within the framework of the local interaction model 11
A. N. KRAIKO: The limiting properties of piecewise-potential subcritical and critical jet streams of an ideal gas 25
S. P. BAUTIN and S. A. YAGUPOV: An analysis of the possibility of the isentropic compression of hydrogen with a real equation of state 37
I. B. BAKHOLDIN: Solitary waves and the structures of discontinuities in non-dissipative models with complex dispersion 43
V. S. GALKIN and S. V. RUSAKOV: Burnett models of the structure of a strong shock wave in a binary mixture of monatomic gases 57
A. M. TER-KRIKOROV: Perturbations from a source in a two-layer atmosphere bounded by the horizontal terrestrial surface 67
I. V. BOCHKAREVA and L. A. KOVALEVA: Oscillatory modes of adsorption in the seepage of multi-component systems 73
A. G. KULIKOVSKII and E. I. SVESHNIKOVA: The effect of a change in entropy on the form of the shock adiabatic curve of quasi-transverse elastic waves 79
Yu. A. USTINOV: Solutions of the Saint-Venant problem for a cylinder with helical anisotropy 89
V. A. KOVTUNENKO: Invariant energy integrals for the non-linear crack problem with possible contact of the crack surfaces 99
N. G. KHOMASUDRIDZE: The thermoelastic equilibrium of conical bodies 111
A. P. MALYSHEV: The construction of a model of frequency-independent damping using the amplitude characteristic of the adsorption coefficient 121
A. A. BUROV: Some equations of mechanics possessing first integrals 129
L. Z. FISHMAN: Unsafe and safe boundaries of the stability region of systems with delay in the case of a pair of pure imaginary roots and one zero root 137
Conference Announcement 141
Contents of next issue 142

VOLUME 67 2003 NUMBER 2

CONTENTS

I. M. ANAN'YEVSKII: Continuous feedback control of perturbed mechanical systems 143
L. D. AKULENKO and A. M. SHMATKOV: Evasion of a fixed sphere by a dynamical object driven by a bounded force 157
S. A. BRYKALOV: Two evasion problems in a plane with separate controls and non-convex terminal sets.. 167
G. V. NAUMOV: Optimal synthesis in a two-dimensional problem with asymmetric constraints on the control 175
A. P. IVANOV: Singularities in the dynamic of systems with non-ideal constraints 185
A. A. BUROV: The existence and stability of the equilibria of mechanical systems with constraints produced by large potential forces 193

A. Kh. GELIG: The stability of non-linear pulse system in the first approximation 201
S. A. AGAFONOV: The stability of non-conservative systems and an estimate of the domain of attraction.. 209
V. M. BUDANOV and Ye. A. DEVYANIN: The motion of wheeled robots 215
A. V. BORISOV and I. S. MAMAYEV: The Hess case in rigid-body dynamics 227
N. G. BANDURIN: Large dynamic displacements and deformation of a massive extensible thread in a moving medium 237
Yu. A. DEM'YANOV, D. V. KOKAREVA and A. A. MALASHIN: Interference between the transverse and longitudinal vibrations in musical strings 243
P. CAPODANNO: The stability and small oscillations of an unduloidal fluid bridge between two coaxial discs under conditions of weightlesness 253
D. V. DOLGIKH and V. V. KISELEV: A two-dimensional model of the dynamics of sharp bending of a non-linearly elastic plate 269
A. A. BURENIN, L. V. KOVTANYUK and M. V. POLONIK: The formation of a one-dimensional residual stress field in the neighbourhood of a cylindrical defect in the continuity of an elastoplastic medium.. 283
R. I. NEPERSHIN: The rolling and slipping of a cylinder along the boundary of an ideally plastic half-space 293
Contents of next issue I

VOLUME 67 2003 NUMBER 3

CONTENTS

Yu. K. ZOTOV: Controllability and stabilization of programmed motions of an automobile-type transport robot 303
L. V. KAMNEVA: The sufficient conditions of stability for the value function of a differential game in terms of singular points 329
M. V. DERYABIN: Invariant measure in the problem of a symmetric ball rolling on a surface 345
A. P. CHUPAKHIN: Invariant submodels of a special vortex 351
V. M. ZHDANOV and G. A. TIRSKII: The use of the moment method to derive the gas and plasma transport equations with transport coefficients in higher-order approximations 365
V. A. KUKUSHKIN: A process of axisymmetric unlimited shock-free compression of a perfect gas 389
A. Yu. VASIL'YEV and Yu. D. CHASHECHKIN: The generation of beams of three-dimensional periodic internal waves in an exponentially stratified fluid 397
I. V. STUROVA: The action of an unsteady external load on a circular elastic plate floating on shallow water 407
Yu. A. DEM'YANOV and A. A. MALASHIN: Transverse-longitudinal waves excited by a plectum in a plucked instrument string 417
Ye. M. ZVERYAYEV: Analysis of the hypotheses used when constructing the theory of beams and plates 425
I. O. OSIPOV: The propagation of the energy of elastic waves in anisotropic media 435
V. A. ROMASHCHENKO: Features of the reflection of waves with strong discontinuities from thin compressible obstacles 453
I. V. PANFEROV: The uniform heating and bending of a two-layer plate 461
Aleksei L'vovich Gol'denveizer (12.01.1911–12.01.2003) 469
Aleksandr Yul'yevich Ishlinskii (06.08.1913–07.02.2003) 471
Victor Pavlovich Korobeinikov (15.03.1929–06.02.2003) 475
Contents of next issue I

VOLUME 67 2003 NUMBER 4

CONTENTS

Announcement 477
Aleksandr Yul'yevich Ishlinskii (on the 90th anniversary of his birth) 479
V. V. BELETSKII: On a problem of A. Yu. Ishlinskii 491
A. P. MARKEYEV: The stability of the Grioli precession 497
G. V. GORR: Precessional motions in rigid body dynamics and the dynamics of systems of coupled rigid bodies 511
L. D. AKULENKO and S. V. NESTEROV: A frequency-parametric analysis of natural oscillations of non-uniform rods 525
Yu. F. GOLUBEV: A robot-balancer on a cylinder 539
V. V. KOZLOV and D. A. ONISHCHENKO: The motion in a perfect fluid of a body containing a moving point mass 553
V. A. GORODTSOV: The anomalous diffusion of wave disturbances in hydrodynamic-type systems 565
I. G. GORYACHEVA: A. Yu. Ishlinskii's researches in the field of rolling friction and their developments .. 575
V. M. ALEKSANDROV: Asymptotic solution of the axisymmetric contact problem for an elastic layer of incompressible material 589
A. A. YEVTUSHENKO and Ye. V. KOVALENKO: The axisymmetric contact problem taking into account transient heat production due to sliding friction 595
E. SCARPETTA and M. A. SUMBATYAN: The single-mode approximation in the problem of the propagation of a plane longitudinal wave in an elastic medium with a periodic system of rectangular defects 601
V. G. BAZHENOV, A. M. BRAGOV, V. L. KOTOV and A. V. KOCHETKOV: An investigation of the impact and penetration of solids of revolution into soft earth 611
'The Third Polyakhov Lectures' International Conference on Mechanics (4–6 February 2003, St Petersburg) .. 621
Contents of next issue I

VOLUME 67 2003 NUMBER 5

CONTENTS

A. P. IVANOV: The stability of mechanical systems with positional non-conservative forces 625
B. R. KLEPFISH: Sensitivity analysis of mechanical systems with unilateral constraints 631
A. A. BUROV: A transformation of the equations of mechanics 639
A. L. KUNITSYN and A. M. CHUDAYEVA: The stability of agglomerations of microparticles in the gravitational-repulsive field of binary stellar systems 647
V. I. KOROBOV and V. A. SKORIK: The synthesis of inertial controls for non-stationary systems 653
M. V. TOPUNOV: The convexity of the reachable set for a bilinear controllable system 665
N. N. PETROV: "Soft" capture in Pontryagin's example with many participants 671
V. Yu. PAKHOTINSKIKH, A. A. USPENSKII and V. N. USHAKOV: The construction of stable bridges in differential games with phase constraints 681
A. M. LUKATSKII: The application of a class of infinite-dimensional Lie groups to the dynamics of an incompressible fluid 693
A. N. KRAIKO, D. Ye. PUDOVIKOV, K. S. P'YANKOV and N. I. TILLYAYEVA: Axisymmetric nose shapes of specified aspect ratio, optimum or close to optimum with respect to wave drag 703
S. A. TAKOVITSKII: Pointed two-parameter power-law nose shapes of minimum wave drag 731
E. N. BERESLAVSKII: Investigation of the squeezing out of the current in some flows in coastal water-bearing layers 737

Yu. G. GUBAREV and V. V. NIKULIN: A criterion of the linear long-wave stability of steady magneto-hydrodynamic jet flows of an ideal fluid 749
P. M. BELOTSERKOVSKII: The steady vibrations and resistance of a railway track to the uniform motion of an unbalanced wheel 763
I. A. SOLDATENKOV: The solution of the contact problem of the theory of elasticity for a thick strip with adhesion 775
D. V. BABICH: The stability of shells of revolution with microdamages 783
Contents of next issue I

VOLUME 67 2003 NUMBER 6

CONTENTS

E. I. GRIGOLYUK (80th birthday tribute) 793
E. I. GRIGOLYUK and Ye. A. LOPANITSYN: The non-axisymmetric postbuckling behaviour of shallow spherical domes 809
D. V. BOIKO, L. P. ZHELEZNOV and V. V. KABANOV: The non-linear deformation and stability of elliptical cylindrical shells under transverse bending 819
G. M. KULIKOV and S. V. PLOTNIKOVA: The contact problem for a geometrically non-linear Timoshenko-type shell 825
Yu. V. LIPOVTSEV: The formulation of transient axisymmetric boundary-value problems of thermoelasticity for shells of revolution and algorithms for solving them 837
P. Ya. NOSATENKO and Yu. Yu. SHIRSHOV: The three-dimensional stress–strain state of cross-ply reinforced shells of revolution when heated 847
Ya. I. BURAK and G. I. MOROZ: A variational formulation and investigation of boundary-value problems of the non-linear theory of plates using an energy approach 857
Ye. A. LOPANITSYN: Geometrically non-linear problems of the bending of orthotropic annular and sectoral plates 865
I. T. SELEZOV: Some degenerate and generalized wave models in elasto- and hydro-dynamics ... 871
F. N. SHKLYARCHUK: An approximate method of calculating the oscillations of a liquid in inclined elastic cavities and channels 879
L. A. FIL'SHTINSKII: Homogeneous solutions of the Dirichlet problem for an anisotropic layer... 887
V. I. MAMAI: The applicability of a model of shear delaminations 893
V. M. KORNEV: The fracture of brittle and ductile crystals. Force and deformation criteria 901
Yu. G. BALAKIREV: Features of the construction of correction functions in the analysis of the free vibrations of mechanical systems by Bubnov's method 911
A. N. DANILIN, Ye. B. KUZNETSOV and V. I. SHALASHILIN: Implicit algorithms for solving the Cauchy problem for the equations of the dynamics of mechanical systems 921
Contents of next issue I
